VELOCITY FROM TMT ANALYSIS

For message hubs worldwide speed and reliability are critical. Which is why companies are making the switch to TMT Analysis's superfast MNP query service Velocity.

Key features

- Response times of less than 5ms*
- Cleanse and batch queries via HTTP
- Access to our Global Number Plan - understand every single telephone number, available either as a snapshot or monthly download.
- Data available for 60+ countries.

With the recent explosion in Application to Person (A2P) messaging and especially two stage authentication, it has become more important than ever for operators to guarantee the successful termination of messaging services. Only with the use of a Global Number Plan, accompanied by the latest Number Portability data, can operators provide the accuracy of routing that their customers now expect.

Countries available

Now 60+ countries including:

- | | | | | | |
|--------------|----------------------|---------------|---------------|----------------|-----------------|
| ■ Albania | ■ Chile | ■ Germany | ■ Latvia | ■ Panama | ■ South Africa |
| ■ Argentina | ■ Colombia | ■ Ghana | ■ Lithuania | ■ Paraguay | ■ South Korea |
| ■ Armenia | ■ Costa Rica | ■ Greece | ■ Macedonia | ■ Peru | ■ Spain |
| ■ Australia | ■ Croatia | ■ Hong Kong | ■ Malaysia | ■ Poland | ■ Sweden |
| ■ Austria | ■ Czech Republic | ■ Hungary | ■ Mexico | ■ Romania | ■ Switzerland |
| ■ Azerbaijan | ■ Denmark | ■ India | ■ Moldova | ■ Russia | ■ Taiwan |
| ■ Bangladesh | ■ Dominican Republic | ■ Israel | ■ Montenegro | ■ Saudi Arabia | ■ Thailand |
| ■ Belgium | ■ El Salvador | ■ Italy | ■ Netherlands | ■ Senegal | ■ Tunisia |
| ■ Bosnia | ■ Estonia | ■ Ivory Coast | ■ New Zealand | ■ Serbia | ■ Turkey |
| ■ Brazil | ■ France | ■ Japan | ■ Nigeria | ■ Singapore | ■ Ukraine |
| ■ Bulgaria | ■ Georgia | ■ Kazakhstan | ■ Norway | ■ Slovakia | ■ UAE |
| ■ Canada | | ■ Kuwait | ■ Pakistan | ■ Slovenia | ■ United States |

* Response times are from the edge of the TMT Analysis network and exclude the time taken by customers to reach our network.

Are your current HLR or MNP Query suppliers delivering response rates of less than 5ms?

In A2P SMS messaging speed is everything. Every second counts when customers are relying on you to route their critical traffic in the quickest most reliable way.

Which is why at TMT Analysis we have developed Velocity, the fastest and the most reliable Global MNP ENUM Query service on the market today, with response times of less than 5ms.

Customers who have switched to Velocity are already resolving hundreds of millions of MNP queries every month within 5 milliseconds. In addition, Velocity allows users to list cleanse and batch queries against our data via HTTP.

So why not request a speed test? Email us at info@tmtanalysis.com to request a test account and see how we compare to your current HLR or MNP Query supplier.

About TMT Analysis

TMT Analysis is a specialist technology, media and telecoms data company. Our customers use us every day to route billions of SMS messages, provide fraud and identity management as well as bespoke insight and market intelligence on mobile networks and devices
